

**Afriball** is an ethnic eco-friendly 3D puzzle hand crafted by the communities in Gauteng and Western Cape.

Afriball supports communities at various levels by giving opportunities to their members including learning disabled students in the production and marketing of the ball, thus creating job opportunities for all.

**Afriball** inspires creativity and mental stimulation and will keep adults and children guessing. The unique outer wire-net of overlapping circles symbolizes the Circle of life and can be molded into various shapes creating many ways to proudly display your **Afriball** by uniquely offering two puzzles in one.

The wire puzzle or wooden puzzle can be sold separately.

**Afriball** is the perfect gift for home, office or classroom.

**Afriball** makes an excellent corporate gifts and can be personalized with your company name printed on the ball and your company colors on the beads of the wire puzzle to further promote your company.

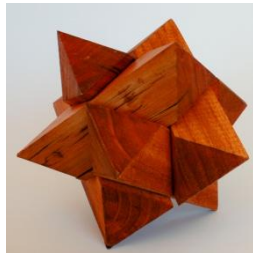

Each **Afriball** has its own wood grain and individual markings that differentiates it from one piece to the next. Wood being a natural product, no two puzzles will ever be the same.

**Afriball** makes use of reclaimed timber where ever possible to minimize the impact to our environment.

The wooden 3d puzzles come in three different sizes and can be made from three types of wood, pine, meranti and ash. The wooden puzzle comes in four different colors, light oak, teak, mahogany and white. There are three different shapes available currently, round, star and square.
